National Confidential Enquiry into Patient Outcome and Death; NCEPOD

<https://psnet.ahrq.gov/issue/national-confidential-enquiry-patient-outcome-and-death>

Launched under the title National Confidential Enquiry into Perioperative Deaths (NCEPOD), this office changed its name to represent broader goals established in 2002. NCEPOD seeks to review clinical practices and make recommendations to improve the quality and delivery of care. They perform confidential surveys exploring a variety of medical care issues and provide recommendations to clinicians and management for implementation.
