

Predicting and preventing adverse drug reactions in the very old.

June 22, 2009

Merle L, Laroche M-L, Dantoine T, et al. Predicting and preventing adverse drug reactions in the very old. *Drugs Aging*. 2005;22(5):375-92.

<https://psnet.ahrq.gov/issue/predicting-and-preventing-adverse-drug-reactions-very-old>

The authors evaluate pathophysiological factors associated with [adverse drug reactions](#) (ADRs) in elderly patients and suggest ways to minimize the risk of ADRs in this population.
