

Improving medication management for patients: the effect of a pharmacist on post-admission ward rounds.

April 6, 2011

Fertleman M, Barnett N, Patel T. Improving medication management for patients: the effect of a pharmacist on post-admission ward rounds. Qual Saf Health Care. 2005;14(3):207-11.

<https://psnet.ahrq.gov/issue/improving-medication-management-patients-effect-pharmacist-post-admission-ward-rounds>

This study examined the impact of active pharmacist involvement during daily rounds for new patients admitted to a general medicine inpatient service. The authors conclude that improvements in the accuracy, prescribing practices, and costs associated with pharmacist-driven medication management at admission can improve the safety of care.
