

ISMP Medication Errors Reporting Program.

December 14, 2010

Institute for Safe Medication Practices

<https://psnet.ahrq.gov/issue/ismp-medication-errors-reporting-program>

The [Institute for Safe Medication Practices](#) (ISMP) administers this national reporting program, which collects confidential reports of medication errors and near misses directly from practitioners. Information is forwarded to the US Food and Drug Administration and product manufacturers. The program also provides access to ISMP's [patient safety organization](#) reporting mechanism and publishes the National Alert Network or NAN Alerts to share information generated from report analysis broadly to support learning.
