

Case study: identifying potential problems at the human/technical interface in complex clinical systems.

May 27, 2011

Caudill-Slosberg M, Weeks WB. Case study: identifying potential problems at the human/technical interface in complex clinical systems. Am J Med Qual. 2005;20(6):353-7.

<https://psnet.ahrq.gov/issue/case-study-identifying-potential-problems-humantechnical-interface-complex-clinical-systems>

The authors present a case study to illustrate system vulnerabilities related to [computerized physician order entry](#) (CPOE) use.
