

Measurement of adverse events using "incidence flagged" diagnosis codes.

July 13, 2010

Jackson T, Duckett S, Shepherd J, et al. Measurement of adverse events using "incidence flagged" diagnosis codes. J Health Serv Res Policy. 2006;11(1):21-6.

<https://psnet.ahrq.gov/issue/measurement-adverse-events-using-incidence-flagged-diagnosis-codes>

The authors analyzed Australian hospital administrative data and found that ICD-10 codes alone are less accurate in identifying adverse events than in combination with "incidence flags."
