

SBAR: a shared mental model for improving communication between clinicians.

February 15, 2017

Haig KM, Sutton S, Whittington J. SBAR: a shared mental model for improving communication between clinicians. *Jt Comm J Qual Patient Saf.* 2006;32(3):167-75.

<https://psnet.ahrq.gov/issue/sbar-shared-mental-model-improving-communication-between-clinicians>

The authors present a case study involving the SBAR (Situation, Background, Assessment, Recommendations) communication tool to support [situational awareness](#) and improve handoff communications.
