

Prescribing errors resulting in adverse drug events: how can they be prevented?

September 28, 2010

Thürmann PA. Prescribing errors resulting in adverse drug events: how can they be prevented? Expert Opin Drug Saf. 2006;5(4):489-93.

<https://psnet.ahrq.gov/issue/prescribing-errors-resulting-adverse-drug-events-how-can-they-be-prevented>

The author discusses how technology can help minimize medication errors and suggests that both the shortcomings and strengths of technology be considered when shaping medication error reduction programs.
