

Improving patient safety and communication through care rounds in a pediatric oncology outpatient clinic.

August 9, 2011

Blough CA, Walrath JM. Improving patient safety and communication through care rounds in a pediatric oncology outpatient clinic. J Nurs Care Qual. 2007;22(2):159-63.

<https://psnet.ahrq.gov/issue/improving-patient-safety-and-communication-through-care-rounds-pediatric-oncology-outpatient>

The authors describe the implementation of daily care rounds. Surveys revealed that staff thought these rounds improved communication and patient safety.
