

Survival from in-hospital cardiac arrest during nights and weekends.

February 3, 2011

Peberdy MA, Ornato JP, Larkin L, et al. Survival from in-hospital cardiac arrest during nights and weekends. JAMA. 2008;299(7):785-92. doi:10.1001/jama.299.7.785.

<https://psnet.ahrq.gov/issue/survival-hospital-cardiac-arrest-during-nights-and-weekends>

This study discovered that survival rates from [in-hospital cardiac arrest](#) are lower during nights and weekends, suggesting a need to further examine existing resuscitative systems during those times.
