

Association of resident fatigue and distress with perceived medical errors.

February 3, 2011

West CP, Tan AD, Habermann TM, et al. Association of resident fatigue and distress with perceived medical errors. JAMA. 2009;302(12):1294-300. doi:10.1001/jama.2009.1389.

<https://psnet.ahrq.gov/issue/association-resident-fatigue-and-distress-perceived-medical-errors>

In this longitudinal survey of residents in a single internal medicine training program, residents who reported higher levels of [burnout](#) or psychological distress were more likely to report committing serious medical errors.
