

Impact of duty-hour restriction on resident inpatient teaching.

October 28, 2009

Mazotti LA, Vidyarthi AR, Wachter RM, et al. Impact of duty-hour restriction on resident inpatient teaching. J Hosp Med. 2009;4(8). doi:10.1002/jhm.448.

<https://psnet.ahrq.gov/issue/impact-duty-hour-restriction-resident-inpatient-teaching>

After the implementation of [duty hours regulations](#), approximately one-quarter of internal medicine residents reported spending less time teaching. Interestingly, residents who taught less were also less likely to report [emotional exhaustion](#), and were more likely to report satisfaction with the quality of care they provided.
