

Enhancing communication in surgery through team training interventions: a systematic literature review.

December 22, 2010

Gillespie BM, Chaboyer W, Murray P. Enhancing communication in surgery through team training interventions: a systematic literature review. AORN J. 2010;92(6):642-57. doi:10.1016/j.aorn.2010.02.015. <https://psnet.ahrq.gov/issue/enhancing-communication-surgery-through-team-training-interventions-systematic-literature>

This review analyzed 12 studies focused on [team training](#) in [surgical](#) settings, and found before-and-after implementation improvements in team practices and complication rates. However, similar to a past [review](#), the authors highlight limitations in study design and the need for additional research on team training strategies.
