

An adverse event screening tool based on routinely collected hospital-acquired diagnoses.

December 29, 2014

Brand CA, Tropea J, Gorelik A, et al. An adverse event screening tool based on routinely collected hospital-acquired diagnoses. Int J Qual Health Care. 2012;24(3):266-78. doi:10.1093/intqhc/mzs007.
<https://psnet.ahrq.gov/issue/adverse-event-screening-tool-based-routinely-collected-hospital-acquired-diagnoses>

This study found high levels of physician agreement using an adverse event [screening tool](#) for patients admitted with chronic heart failure and pneumonia.
