

Surgeon commitment to trauma care decreases missed injuries.

September 27, 2017

Lin Y-K, Lin C-J, Chan H-M, et al. Surgeon commitment to trauma care decreases missed injuries. *Injury*. 2014;45(1):83-7. doi:10.1016/j.injury.2012.10.019.

<https://psnet.ahrq.gov/issue/surgeon-commitment-trauma-care-decreases-missed-injuries>

Full-time trauma surgeons had a lower incidence of [diagnostic errors](#) (defined as the incidence of missed injuries in severely injured patients) compared with surgeons who primarily practiced in other specialties, according to this retrospective analysis of patients admitted to a Taiwanese surgical intensive care unit.
