

Public perceptions and preferences for patient notification after an unsafe injection.

June 28, 2013

Schneider AK, Brinsley-Rainisch KJ, Schaefer MK, et al. Public perceptions and preferences for patient notification after an unsafe injection. J Patient Saf. 2013;9(1):8-12. doi:10.1097/PTS.0b013e318269992d. <https://psnet.ahrq.gov/issue/public-perceptions-and-preferences-patient-notification-after-unsafe-injection>

This focus group study emphasizes the need for prompt and empathetic notification of patients potentially affected by [unsafe injection practices](#). A [prior Australian study](#) discusses methods used for mass notification of patients after a large-scale error.
