

Patient Safety 2015: Final Technical Report.

April 18, 2016

Washington, DC: National Quality Forum; 2016.

<https://psnet.ahrq.gov/issue/patient-safety-2015-final-technical-report>

The value of current measures to track patient safety has been called into [question](#). This technical report provides information about a consensus-driven initiative to evaluate the reliability of existing patient safety measures in tracking and assessing safety in hospitals, across various populations and settings. The related website offers resources related to the project history.
