

## Evaluation of near-miss wrong-patient events in radiology reports.

November 4, 2015

Sadigh G, Loehfelm T, Applegate KE, et al. JOURNAL CLUB: Evaluation of Near-Miss Wrong-Patient Events in Radiology Reports. AJR Am J Roentgenol. 2015;205(2):337-43. doi:10.2214/AJR.14.13339. <https://psnet.ahrq.gov/issue/evaluation-near-miss-wrong-patient-events-radiology-reports>

---

Despite [The Joint Commission](#) requirement to use at least two patient identifiers when obtaining an imaging study, [wrong-patient](#) events still occur. This retrospective case review study determined the prevalence of reported [near-miss](#) wrong-patient events in radiology at two large academic hospitals. The overall event rate was 4 per 100,000 radiology studies.
