---

The 2015 conference focused on persisting barriers to patient safety worldwide and recommended strategies to achieve lasting improvement, including dedication to systems engineering, patient-centeredness, and process [integration](#). The session summarized findings of a report developed for the event, *Transforming Patient Safety: a Sector-wide Systems Approach*. The proceedings collection includes the full text of the report, video of the panel, and podcasts with Margaret Murphy, [Dr. Mary Dixon-Woods](#), [Dr. Peter Pronovost](#), and other participants.
