

Rapid response teams improve outcomes—Part 1, Part 2, and Part 3.

March 30, 2016

Intensive Care Med. 2016;42(4):591-601.

<https://psnet.ahrq.gov/issue/rapid-response-teams-improve-outcomes-part-1-part-2-and-part-3>

This three-part commentary presents differing views on whether [rapid response teams](#) (RRTs) improve patient [outcomes](#) and recommends that further [research](#) is required to determine ideal RRT staffing, factors that contribute to the need for an RRT, and how rapid response affects the safety of hospitalized patients.
