

Dual-process cognitive interventions to enhance diagnostic reasoning: a systematic review.

September 20, 2016

Lambe KA, O'Reilly G, Kelly BD, et al. Dual-process cognitive interventions to enhance diagnostic reasoning: a systematic review. *BMJ Qual Saf.* 2016;25(10):808-820. doi:10.1136/bmjqs-2015-004417. <https://psnet.ahrq.gov/issue/dual-process-cognitive-interventions-enhance-diagnostic-reasoning-systematic-review>

This systematic review explored interventions to augment [diagnostic reasoning](#) among physicians. Cognitive forcing and guided reflection were two strategies that consistently improved cognition. This finding suggests that these methods should be more widely implemented to enhance timely and accurate [diagnosis](#).
