

## Safe implementation of standard concentration infusions in paediatric intensive care.

May 9, 2017

Arenas-López S, Stanley IM, Tunstell P, et al. Safe implementation of standard concentration infusions in paediatric intensive care. *Journal of Pharmacy and Pharmacology*. 2016;69(5). doi:10.1111/jphp.12580. <https://psnet.ahrq.gov/issue/safe-implementation-standard-concentration-infusions-paediatric-intensive-care>

---

[Pediatric medication safety](#) is particularly challenging due to complexity around weight-based dosing. According to a retrospective study in a pediatric intensive care unit, most morphine-related medication administration errors could have been prevented with technology interventions such as [barcode medication administration](#). The authors advocate for implementing standardized morphine infusions to improve safety.
