

Fatigue in hospital nurses—'Supernurse' culture is a barrier to addressing problems: a qualitative interview study.

December 14, 2016

Steege LM, Rainbow JG. Fatigue in hospital nurses - 'Supernurse' culture is a barrier to addressing problems: A qualitative interview study. *Int J Nurs Stud*. 2017;67:20-28. doi:10.1016/j.ijnurstu.2016.11.014. <https://psnet.ahrq.gov/issue/fatigue-hospital-nurses-supernurse-culture-barrier-addressing-problems-qualitative-interview>

Nurse [fatigue](#) is associated with [omissions](#) and errors in care. This qualitative study found that [nursing](#) professional culture in its current state poses a challenge to effectively mitigating fatigue among nurses. The authors advocate for future research to develop culture change models and strategies that address these barriers.
