

Association between organisational and workplace cultures, and patient outcomes: systematic review.

January 17, 2018

Braithwaite J, Herkes J, Ludlow K, et al. Association between organisational and workplace cultures, and patient outcomes: systematic review. *BMJ Open*. 2017;7(11). doi:10.1136/bmjopen-2017-017708.

<https://psnet.ahrq.gov/issue/association-between-organisational-and-workplace-cultures-and-patient-outcomes-systematic>

This systematic review found that despite the lack of randomized trials, there is a consistent association between [safety culture](#) and patient outcomes such as [falls](#), [hospital-acquired infections](#), and mortality. The authors conclude that efforts to enhance safety culture are likely to improve patient outcomes.
