

Comparison of military and civilian methods for determining potentially preventable deaths: a systematic review.

May 23, 2018

Janak JC, Sosnov JA, Bares JM, et al. Comparison of Military and Civilian Methods for Determining Potentially Preventable Deaths: A Systematic Review. JAMA Surg. 2018;153(4):367-375.

doi:10.1001/jamasurg.2017.6105.

<https://psnet.ahrq.gov/issue/comparison-military-and-civilian-methods-determining-potentially-preventable-deaths>

This systematic review compared military [mortality reviews](#) to nonmilitary studies of pre- or in-hospital mortality reviews. The authors note widely varying review processes, data inclusion, and [preventability assessment](#), and recommend standardization of definitions and processes in order to reduce bias.
