This webinar recording provides information on the updated Hospital Survey on Patient Safety Culture™ (SOPS™) 2.0. The hospital survey was revised and pilot tested after incorporating user feedback. The Hospital SOPS survey, which has been used by hundreds of hospitals in the U.S. and overseas, allows healthcare providers and staff to assess a hospital's patient safety culture. Speakers at the webinar discussed what's different and what to expect when transitioning to the revised survey. Access the [SOPS Hospital Survey 2.0](#), including a user's guide, as well as results from a [2019 Pilot Test of Version 2.0](#) and [frequently asked questions](#).
