

## **Prospective validation of classification of intraoperative adverse events (ClassIntra): international, multicentre cohort study.**

October 7, 2020

Dell-Kuster S, Gomes NV, Gawria L, et al. Prospective validation of classification of intraoperative adverse events (ClassIntra): international, multicentre cohort study. *BMJ*. 2020;370:m2917. doi:10.1136/bmj.m2917. <https://psnet.ahrq.gov/issue/prospective-validation-classification-intraoperative-adverse-events-classintra-international>

---

This cohort study enrolled 18 sites across 12 countries to assess the validity of a newly developed classification system (ClassIntra v1.0) for [assessing](#) intraoperative [adverse events](#). Results indicate that the tool has high criterion validity and can be incorporated into routine practice in perioperative surgical safety checklists or used as a monitoring/reporting tool.
