

Measurement and monitoring patient safety in prehospital care: a systematic review.

February 24, 2021

O'Connor P, O'malley R, Oglesby A-M, et al. Measurement and monitoring patient safety in prehospital care: a systematic review. Int J Health Care Qual. 2021;33(1):mzab013. doi:10.1093/intqhc/mzab013. <https://psnet.ahrq.gov/issue/measurement-and-monitoring-patient-safety-prehospital-care-systematic-review>

Patient safety problems can be [challenging](#) to [detect](#). This systematic review identified a variety of methods for [measuring](#) and monitoring patient safety in prehospital care settings (e.g., emergency medical services, air medical transport). They include surveys, patient record reviews, incident reporting systems, interviews, and checklists.
