

## Use of prescribing safety quality improvement reports in UK general practices: a qualitative assessment.

July 14, 2021

Khan NF, Booth HP, Myles P, et al. Use of prescribing safety quality improvement reports in UK general practices: a qualitative assessment. BMC Health Serv Res. 2021;21(1). doi:10.1186/s12913-021-06417-0. <https://psnet.ahrq.gov/issue/use-prescribing-safety-quality-improvement-reports-uk-general-practices-qualitative>

---

This study assessed how and when quality improvement (QI) [feedback](#) reports on [prescribing](#) safety are used in one general practice in the UK. Four themes were identified: receiving the report, facilitators and barriers to acting upon the report, acting upon the report, and how the report contributes to a quality culture. Facilitators included effective dissemination of reports while barriers included lack of time to act upon the reports. As most [practitioners](#) indicated the QI reports were useful, efforts should be made to address barriers to acting upon the reports.
