The COVID-19 pandemic has [disrupted](#) many aspects of health care delivery and has placed unprecedented [pressure](#) on [health care workers](#). This consensus statement, based on input from an international panel of individuals with expertise in health leadership, health care, and public health, outlines 10 imperatives to guide health and public leaders during the post emergency stage of the pandemic. Imperatives addressed in the framework include [supporting](#) staff well-being and psychological health, preparing for future emergencies, managing the backlog of [delayed care](#), and the importance of sustaining learning, innovations and collaborations that arose during the pandemic.
