[Massive online open courses](#) (MOOCs) have the ability to reach a broad audience of learners. The Science of Safety in Healthcare MOOC was delivered in 2013 and 2014. At completion of the course, participants reported increased confidence on all six measured domains (teamwork, communication, managing risk, human environment, recognizing and responding, and culture). At 6 months post-completion, the majority agreed the content was useful and positively influenced their clinical practice, demonstrating that MOOCs are an effective [interprofessional](#) learning format.
