California law requires adverse events that led to serious injury or [death](#) because of hospital noncompliance to be reported to the state licensing agency. These [events](#) are referred to as “immediate jeopardy.” Using publicly available data, this study analyzed all immediate jeopardy cases between 2007 and 2017. Of the 385 immediate jeopardy cases, 36.6% led to patient death, and the most common category was [surgical](#).
