

Designing safety interventions for specific contexts: results from a literature review.

October 26, 2022

Karanikas N, Khan SR, Baker PRA, et al. Designing safety interventions for specific contexts: Results from a literature review. Safety Sci. 2022;156:105906. doi:10.1016/j.ssci.2022.105906.

<https://psnet.ahrq.gov/issue/designing-safety-interventions-specific-contexts-results-literature-review>

Some patient safety interventions, such as [checklists](#), are adapted or borrowed from other industries, such as aviation. This literature review focused on safety [interventions](#) developed in one context then implemented in another, such as healthcare. Healthcare was the largest sector represented, with 20 of the 73 [included](#) studies.
