

## **Psychosocial working conditions as determinants of concerns to have made important medical errors and possible intermediate factors of this association among medical assistants - a cohort study.**

March 8, 2023

Mambrey V, Angerer P, Loerbroks A. Psychosocial working conditions as determinants of concerns to have made important medical errors and possible intermediate factors of this association among medical assistants – a cohort study. BMC Health Serv Res. 2022;22(1):1501. doi:10.1186/s12913-022-08895-2. <https://psnet.ahrq.gov/issue/psychosocial-working-conditions-determinants-concerns-have-made-important-medical-errors-and>

---

Committing errors can result in significant [emotional impact](#) on clinicians. In this study, a survey of medical assistants in Germany found that poor collaboration was a key predictor of concerns for having committed a medical error.
