

Patient safety trends in 2022: an analysis of 256,679 serious events and incidents from the nation's largest event reporting database.

May 17, 2023

Kepner S, Jones RM. Patient Safety Trends in 2022: an analysis of 256,679 serious events and incidents from the nation's largest event reporting database. *Patient Saf.* 2023;5(2):6-19. doi:10.33940/001c.74752. <https://psnet.ahrq.gov/issue/patient-safety-trends-2022-analysis-256679-serious-events-and-incidents-nations-largest-event>

Pennsylvania requires all acute care facilities to report incidents and serious events to the [Pennsylvania Patient Safety Reporting System \(PA-PSRS\)](#). This report compiles reports submitted for Q1 and Q2 2022 and compares results to [previous years](#). There was a decrease in the total number of reports submitted, but serious and high harm events increased. The most frequently reported event continues to be Error Related to Procedure/Treatment/Test followed by Complication of Procedure/Treatment/Test, Medication Error, and Fall. In November 2023, an [update](#) was published reflecting the addition of Q3 and Q4 2022 data.
