

Adolescents identifying errors and omissions in their electronic health records: a national survey.

June 7, 2023

Hagström J, Blease CR, Kharko A, et al. Adolescents identifying errors and omissions in their electronic health records: a national survey. *Stud Health Technol Inform.* 2023;302:242-246. doi:10.3233/shti230111. <https://psnet.ahrq.gov/issue/adolescents-identifying-errors-and-omissions-their-electronic-health-records-national-survey>

Patients are increasingly able to access their health record via electronic patient [portals](#) and many report finding errors in the record. This study asked [adolescent](#) (ages 15-19) patient portal users if they had identified errors or omissions in their record, and if so, did they report them to their provider. Approximately one-quarter of patients identified an error and 20% identified an omission. The majority of those patients did not [report](#) it to the clinic or healthcare provider.
