---

When the US Supreme Court overturned *Roe v. Wade*, access to safe reproductive care was restricted even for patients with [wanted](#) or [non-viable](#) pregnancies. This study describes trends in early pregnancy-related emergency department visits prior to the court decision and how new restrictions have resulted in physician uncertainty and [delays](#) in care in states with abortion bans. The authors recommend physicians be mindful of Emergency Medical Treatment and Active Labor Act (EMTALA) when caring for pregnant individuals in the emergency department.
