---

Large-scale data analysis provides insights to generate [evidence-based](#) improvement action. This collection of reports provides access to investigations of the impact of healthcare-related harm events in Department of Health and Human Services (HHS) programs and across the United States health system. This set of publications not only examines weaknesses but provides recommendations for improvement on topics such as gaps in fall reporting by [home health agencies](#), Medicare adverse events and the [viability](#) of payment incentives as a strategy for medical harm reduction.
