

## Diagnostic Safety Toolkit.

June 1, 2022

Diagnostic Safety Toolkit.

<https://psnet.ahrq.gov/issue/diagnostic-safety-toolkit-0>

---

Effective [communication](#) is critical as patients shift from one level of care to another as their diagnosis evolves. This toolkit is designed to help [academic medical centers](#) initiate conversations to improve diagnostic information sharing during [transitions](#) from acute care environments to non-acute care settings. Tools in the set include test follow-up vignettes for process evaluation, a communication practices, inventory and a facilitator's guide.
