

Toward a responsible future: recommendations for AI-enabled clinical decision support.

October 16, 2024

Labkoff S, Oladimeji B, Kannry J, et al. Toward a responsible future: recommendations for AI-enabled clinical decision support. J Am Med Inform Assoc. 2024;31(11):2730-2739. doi:10.1093/jamia/ocae209. <https://psnet.ahrq.gov/issue/toward-responsible-future-recommendations-ai-enabled-clinical-decision-support>

Before being implemented into clinical practice, [artificial intelligence-enabled clinical decision support](#) (AI-CDS) requires careful evaluation. This article presents the consensus recommendations from an interdisciplinary workgroup on [safe](#) integration of AI-CDS. Key [considerations](#) include transparency, equity, monitoring, and user training.
