---

[Patients for Patient Safety US](#) (PFPS-US) is a patient- and family-led organization to improve healthcare in the United States. This article describes the PFPS-US [Artificial Intelligence](#) Working Group's priority areas of concern: data integrity and bias, efficacy, payment, and transparency toward shared learning. The PFPS-US AI Working Group stresses patients should have an [active](#) role in all stages of development and implementation of AI.
