This webinar highlighted two evidence reports from AHRQ's [Making Healthcare Safer IV](#) Reports, a series developed to support patient safety improvement efforts across healthcare systems. [Failure To Rescue – Rapid Response Systems](#) reviews rapid response systems' impacts on patient safety and clinical outcomes, and ways rapid response systems can be implemented effectively. [Making Healthcare Safer IV: Opioid Stewardship](#) explores the use of prescribed and ordered opioids, including strategies for using these medications effectively and their unintended consequences.
