[The impact of coronavirus disease 2019 \(COVID-19\) on healthcare-associated infections in 2020: a summary of data reported to the National Healthcare Safety Network.](#)

Weiner-Lastinger LM, Pattabiraman V, Konnor RY, et al. *Infect Control Hosp Epidemiol.* 2022;43:12-25.

Using data reported to the National Healthcare Safety Network, this study identified significant increases in the incidence of healthcare-associated infections from 2019 to 2020. The authors conclude that these findings suggest a need to return to...

[The influence of COVID-19 visitation restrictions on patient experience and safety outcomes: a critical role for subjective advocates.](#)

Silvera GA, Wolf JA, Stanowski A, et al. *Patient Exp J.* 2021;8:30-39.

Research has found that families and caregivers play a key role in identifying and preventing patient safety events. Based on a national sample of hospitals, this study explored the impact of hospital visitation restrictions during the COVID-19...

[Learning during crisis: the impact of COVID-19 on hospital-acquired pressure injury incidence.](#)

Polancich S, Hall AG, Miltner RS, et al. *J Healthc Qual.* 2021;43:137-144.

The COVID-19 pandemic has disrupted many aspects of health care delivery, including how hospitals prevent common hospital-acquired conditions such as pressure injuries. Based on retrospective data, the authors of this study did not identify a...

[Adverse events in Italian nursing homes during the COVID-19 epidemic: a national survey.](#)

Lombardo FL, Salvi E, Lacorte E, et al. *Front Psychiatry.* 2020;11:578465.

Long-term care and skilled nursing facilities are particularly vulnerable to COVID-19 infection; this increased risk may present other threats to patient safety. This survey of nursing homes in Italy found that one third of facilities reported at...

[Diagnosis of physical and mental health conditions in primary care during the COVID-19 pandemic: a retrospective cohort study.](#)

Williams R, Jenkins DA, Ashcroft DM, et al. *The Lancet Pub Health.* 2020;5:e543-e550.

The COVID-19 pandemic has led to patients delaying or forgoing necessary health care, which can contribute to diagnostic and treatment delays. This retrospective cohort study used primary care data to investigate the...
