

Organizational Learning

Curated Library

Foundations

[An Organisation with a Memory: Report of an Expert Group on Learning from Adverse Events in the NHS Chaired by the Chief Medical Officer.](#)

Donaldson L. London, UK: The Stationery Office, 2000.

An Organisation with a Memory set out to understand what was known about the scale and nature of serious failures in the United Kingdom's National Health Service (NHS) system, examine how the NHS might learn from those failures, and recommend methods...

[Strategies for learning from failure.](#)

Edmondson A. Harv Bus Rev. 2011;89:48-55, 137.

Failures are inevitable in any industry, especially in one as complex as health care. The ability to learn from failures is a crucial characteristic of high reliability organizations, and creating a climate that emphasizes organizational learning is...

[Best Care at Lower Cost: The Path to Continuously Learning Health Care in America.](#)

Smith M, Saunders R, Stuckhardt L, McGinnis JM, eds. Committee on the Learning Health Care System in America, Institute of Medicine. Washington, DC: National Academies Press; 2012. ISBN: 9780309260732.

This Institute of Medicine (IOM) report presents evidence of poor quality care and significant waste (to the tune of an estimated \$750 billion per year) in the American health care system. It emphasizes the importance of continuous learning—not only...

[Organizational learning: health care leaders need to design structures and processes that enhance collective learning.](#)

Bohmer RM, Edmondson AC. Health Forum J. 2001;44:32-35.

This commentary discusses the context surrounding organizational learning. As knowledge and skills frequently become outdated, a need to develop new learning capabilities must be emphasized. The authors present existing research to illustrate the...

[Engineering a Learning Healthcare System: A Look at the Future: Workshop Summary.](#)

Grossmann C, Goolsby WA, Olsen L, McGinnis JM; Institute of Medicine and National Academy of Engineering. Washington, DC: The National Academies Press; 2011. ISBN: 9780309120647.

This report builds on earlier work discussing how process and systems engineering practices can help health care organizations improve quality and safety.

[Work Design Drivers of Organizational Learning about Operational Failures: A Laboratory Experiment on Medication Administration.](#)

Tucker AL. Cambridge, MA: Harvard Business School; November 19, 2012. (Revised September 2013). HBS Working Paper No. 13-044.

This paper investigates techniques for engaging frontline employees in proactive organizational improvement instead of creating individual workarounds.

[An organizational learning framework for patient safety.](#)

Edwards MT. Am J Med Qual. 2016;32:148-155.

Organizations are encouraged to learn from their failures, but evidence shows that changes after errors are not always implemented. This commentary presents a model to help organizations learn from system failures through focusing on improvements...

[Organisational learning in hospitals: a concept analysis.](#)

Lyman B, Hammond EL, Cox JR. J Nurs Manag. 2019;27:633-646.

Organizations are encouraged to learn from failures and sustain improvement. This review defines the concept of organizational learning, characteristics of the activity, and the key attributes needed to support it. The authors summarize the role that...

[Organizational learning in hospitals: a realist review.](#)

Lyman B, Jacobs JD, Hammond EL, et al. J Adv Nurs. 2019;75:2352-2377.

Organizations are encouraged to learn from failures. This review synthesizes the research on organizational learning in hospitals, including contextual factors that affect it, how such learning occurs, and improvements implemented as a result.

[Becoming a high-reliability organization through shared learning of safety events](#)

Klenklen J. Patient Saf Qual HCare. December 19, 2019.

High reliability organizations consistently examine what goes wrong and remain aware that failure can happen at any time. This article discusses a learning model built upon event definition, rapid contributing factor identification, system-focused...

[Safer Together: A National Action Plan to Advance Patient Safety.](#)

Boston, MA: Institute for Healthcare Improvement: September 2020.

This National Action Plan developed by the National Steering Committee for Patient Safety – a group of 27 national organizations convened by the Institute for Healthcare Improvement – provides...

Implementation

[Creating a learning health system for improving diagnostic safety: pragmatic insights from US health care organizations.](#)

Giardina TD, Shahid U, Mushtaq U, et al. *J Gen Intern Med.* 2022;37:3965-3972.

Achieving diagnostic safety requires multidisciplinary approaches. Based on interviews with safety leaders across the United States, this article discusses how different organizations approach diagnostic safety. Respondents discuss barriers to...

[Towards safer healthcare: qualitative insights from a process view of organisational learning from failure.](#)

Monazam Tabrizi N, Masri F. *BMJ Open.* 2021;11:e048036.

In this qualitative study, researchers interviewed 40 clinicians in high- and low-performing hospitals to better understand the barriers to effective organizational learning from medical errors. Findings from these interviews suggest that the primary...

[Learning from safety incidents in high reliability organizations: a systematic review of learning tools that could be adapted and used in healthcare.](#)

Serou N, Sahota LM, Husband AK, et al. *Int J Qual Health Care.* 2021;33:mzab046.

High reliability organizations consistently examine and learn from failures. This systematic review identified several effective learning tools that can be adapted and used by multidisciplinary health care teams following a patient safety incident,...

[Safety investigations from across the pond: deep learning from England's Healthcare Safety Investigation Branch \(HSIB\).](#)

ISMP Medication Safety Alert! Acute Care Edition. October 8, 2020;25(20):1-4

In-depth investigations provide multidisciplinary insights that inform sustainable improvement opportunities. This newsletter story highlights a drug administration error examination by a dedicated office in the United Kingdom to illustrate the...

[Nurses' experiences of organizational learning.](#)

Lyman B, Biddulph ME, Hopper VG, et al. *J Nurs Manag.* 2020;28:1241-1249.

This study used semi-structured interviews with nurses to explore their experiences with organizational learning. Thematic analyses revealed that organizational learning was more effective when closely aligned with the Organisational Learning in...

[Kaiser Permanente's performance improvement system, part 4: creating a learning organization.](#)

Schilling L, Dearing JW, Staley P, et al. *Jt Comm J Qual Patient Saf.* 2011;37:532-43.

This article discusses Kaiser Permanente's efforts to develop a performance improvement system and become a learning organization.

Safety II

[Learning from errors and resilience.](#)

Arnal-Velasco D, Heras-Hernando V. *Curr Opin Anaesthesiol.* 2023;36:376-381.

The Safety II framework and organizational resilience both focus on what goes right in healthcare and adjusting to disturbances through anticipation, monitoring, responding, and learning. This narrative review highlights recent research conducted...

Technology

[A natural language processing approach to categorise contributing factors from patient safety event reports.](#)

Tabaie A, Sengupta S, Pruitt ZM, et al. *BMJ Health Care Inform.* 2023;30(1):e100731.

Analyzing patient safety incident reports is essential to organizational learning, but comes with both a time and financial burden. This study found that natural language processing can be used to process unstructured patient safety event reports and...

[Health technology, quality and safety in a learning health system.](#)

Borycki EM, Kushniruk AW. *Healthc Manage Forum.* 2023;51:212-221.

Health technology has improved many aspects of care, but can also introduce new safety concerns that require active monitoring and improvement. This commentary describes how learning health systems can improve the safety of new technologies, such as...

[Understanding the roles of three academic communities in a prospective learning health ecosystem for diagnostic excellence.](#)

Satterfield K, Rubin JC, Yang D, et al. *Learn Health Syst.* 2019;4:e210204.

The authors interviewed 32 individuals with expertise in learning health systems to explore how such systems can work towards diagnostic excellence. Data, management, and behavioral barriers are discussed, such as the need to standardize measurement,...

[Using a network organisational architecture to support the development of Learning Healthcare Systems.](#)

Britto MT, Fuller SC, Kaplan HC, et al. *BMJ Qual Saf.* 2018;27.

The National Academy of Sciences has advocated for a Learning Healthcare System in which patients are engaged in shared decision-making to choose evidence-based, high-quality care. However, realizing the vision of a system that improves over time as...
