

# Patient and Family Engagement in Long Term Care

## Curated Library

### Foundations

#### [Long-term Care and Patient Safety](#)

Deb Bakerjian PhD, APRN, FAAN, FAANP, FGSA | April, 10 2024

A large and growing number of Americans require care in skilled nursing facilities, inpatient rehabilitation facilities, or long-term acute care hospitals, often after an acute hospitalization. Data indicates that more than 20% of patients in these settings experience an adverse event during their stay.

#### [Patient and Family Roles in Safety](#)

Beverly H. Johnson, FAAN, Merton Lee, PharmD, PhD, Sarah E. Mossburg, RN, PhD | June 14, 2023

This piece discusses how family presence and participation in healthcare at all levels can improve patient safety as well as how the COVID-19 pandemic affected partnership with patients and families, ultimately highlighting the critical importance of...

#### [Resident and family engagement in medication management in aged care facilities: a systematic review.](#)

Manias E, Bucknall T, Hutchinson AM, et al. Expert Opin Drug Saf. 2021:1-19.

Medication errors are a common cause of preventable harm in long-term care facilities. This systematic review explored how residents and families engage in medication management in aged care facilities. Factors hindering effective engagement included...

#### [Patient Safety in Frail Older Patients](#)

November 26, 2019

This piece describes patient safety risks when caring for frail older patients and summarizes potential approaches for clinicians to minimize this risk.

#### [The Economics of Patient Safety Part III: Long-term Care: Valuing Safety for the Long Haul.](#)

de Bienassis K, Llana-Nozal A, Klazinga N for the Organisation for Economic Co-operation and Development. Paris, France: OECD Publishing; 2020. OECD Health Working Papers, No. 121.

Adverse events in long term care facilities are exacerbated due to staffing, training and financial challenges. This report examined the costs of avoidable problems in long term care and suggests prevention strategies that center on workforce skill...

[A scoping review of adverse incidents research in aged care homes: learnings, gaps, and challenges.](#)

St Clair B, Jorgensen M, Nguyen A, et al. *Gerontol Geriatr Med.* 2022;8:23337214221144192.

Older adults in long-term care settings can be vulnerable to patient safety incidents. This scoping review of 46 articles identified several gaps in the research on adverse events in long-term care and nursing home settings, including the absence of...

[Reconceptualizing patient safety beyond harm: insights from a mixed-methods qualitative inquiry.](#)

Jeffs L, Kuluski K, Flintoft V, et al. *J Nurs Care Qual.* 2024;39:226-231.

Patients provide a unique insight on patient safety. In this study, patients and care partners report that feeling safe or unsafe involves more than only physical safety. They highlight the role of psychological safety, such as feeling listened to...

## **Gaps**

[An invisible disability: communication, patient safety and dual sensory impairment in older persons.](#)

Dunsmore ME, Watharow A, Schneider J. *J Adv Nurs.* 2024;Epub Mar 22.

Patient inability to see and hear diminishes the effectiveness of their care experience, yet these conditions are not always readily evident to clinicians. This commentary highlights the need for increased attention to dual sensory impairment as a...

[Community Living Centers: VA Needs to Strengthen Its Approach for Addressing Resident Complaints.](#)

Washington, DC: United States Government Accountability Office; November 30, 2021. Publication GAO-22-105142.

Patient complaints have the potential to be used for care improvement as they surface problems in health facilities. This report examined complaint response processes in Veterans Affairs nursing homes and found them lacking. Five recommendations...

[Measuring safety in older adult care homes: a scoping review of the international literature.](#)

Rand S, Smith N, Jones K, et al. *BMJ Open.* 2021;11:e043206.

Care home settings, such as nursing homes or residential care homes, present unique challenges to patient safety. This systematic review identified several gaps in the available safety measures used for quality monitoring and improvement in older...

## **Tools and Initiatives**

[Care Compare.](#)

Centers for Medicare and Medicaid Services.

The Centers for Medicare & Medicaid Services (CMS) support transparency through the provision of publicly available information on the quality of health care service in the United States. This portal enables access to comparative quality and...

## [Patient and Family Centered I-PASS \(Family-Centered Communication Program to Reduce Medical Errors and Improve Family Experience and Communication Processes\)](#)

January 31, 2024

Medical errors (all errors in medicine), harmful errors (medical errors that specifically lead to patient harm), and adverse events (harms due to medical care) are leading causes of death and harm in patients in the hospital setting.<sup>1,2</sup> Communication...

## [Adopting the Fall Tailoring Interventions for Patient Safety \(TIPS\) program to engage older adults in fall prevention in a nursing home.](#)

Tzeng H-M, Jansen LS, Okpalauwaekwe U, et al. *J Nurs Care Qual.* 2021;36:327-332.

Patient falls are an ongoing patient safety concern, yet mitigating falls among inpatients remains challenging. This article describes one nursing home's experience adapting the Fall TIPS program for use in their patient population. The program,...

## [Development of an instrument to measure seniors' patient safety health beliefs: the Seniors Empowerment and Advocacy in Patient Safety \(SEAPS\) survey.](#)

Elder NC, Regan SL, Pallerla H, et al. *Patient Educ Couns.* 2007;69:100-107.

This study discusses the development of a survey tool to assess elderly patients' ability to engage in patient safety behaviors as well as their comfort discussing patient safety with their physicians.

## [A national implementation project to prevent catheter-associated urinary tract infection in nursing home residents.](#)

Mody L, Greene T, Meddings J, et al. *JAMA Intern Med.* 2017;177:1154-1162.

Catheter-associated urinary tract infections are considered preventable never events. This pre-post implementation project conducted in long-term care facilities employed a multimodal intervention, similar to the Keystone ICU project. This...

## [How Safe is Your Care? Measurement and Monitoring of Safety Through the Eyes of Patients and Their Care Partners.](#)

Jefs L, Kuluski K, MacLaurin A, et al. Ottawa, Ontario, Canada: Healthcare Excellence Canada; 2022.

Patient engagement in safety improvement goes beyond activities related to direct care. This report highlights the value that patient perspectives bring to the effort to translate the results of a national measures program to strengthen strategic...

## [Designing an intervention to improve medication safety for nursing home residents based on experiential knowledge related to patient safety culture at the nursing home front line: cocreative process study.](#)

Juhl MH, Soerensen AL, Vardinghus-Nielsen H, et al. *JMIR Form Res.* 2024;8:e54977.

Residents of nursing homes (NH) often require multiple medications to treat their chronic conditions. This article describes the co-creation of an intervention to improve medication safety in Danish nursing homes. Unlicensed healthcare personnel who...
